AVUTHU KUSHWANT KUMAR REDDY

Hyderabad, India | +91 9490248160 | kushwant.work@gmail.com | linkedin.com/in/kushwant-kr | github.com/mdecoder24

PROFESSIONAL SUMMARY

AI Researcher and Full Stack Developer with a Computer Science (AI & ML) degree, specializing in LLMs, Retrieval-Augmented Generation (RAG), and deep learning. IEEE-published in computer vision; builds LLM-powered applications end to end with Python, React, TypeScript, Node.js, and PostgreSQL. Nine-time hackathon finalist, driven to turn AI research into impactful products at scale.

EDUCATION

B.Tech, Computer Science (AI & ML) — MLR Institute of Technology, Hyderabad | CGPA: 7.64/10 *2022 – 2026*

TECHNICAL SKILLS

- **Languages:** JavaScript (ES6/ES7), TypeScript, Python, Java, Dart, SQL, HTML5, CSS3
- **Frontend:** React, Redux, Next.js (App Router), Tailwind CSS, shadcn/ui, Radix UI, Framer Motion, Responsive & Adaptive Web Design, DOM manipulation, JSON
- **Backend & Databases:** Node.js, RESTful APIs, Microservices, Multi-tier Architecture, PostgreSQL (Supabase), Firebase, NoSQL, Prisma
- **AI/ML:** Machine Learning, Deep Learning, Computer Vision, Generative AI, LLM Integration, Retrieval-Augmented Generation (RAG), Prompt Engineering, Vector Search (pgvector), Gemini API
- **ML Frameworks & Libraries:** PyTorch, TensorFlow, Keras, scikit-learn, Hugging Face, OpenCV, MediaPipe, Pandas, NumPy
- **Cloud & DevOps:** AWS (EC2, Lambda, S3), CI/CD (GitHub Actions, Vercel), Git, GitHub, Agile/Scrum, Vercel Analytics, Core Web Vitals

PROFESSIONAL EXPERIENCE

Associate Software Engineer — Knowvation Learnings Pvt Ltd *Feb 2026 – Present*

- Managed the Knowvation Learnings website and client-facing web platforms end to end as a full stack web developer, reducing API latency by 40% through relational database indexing and improved API structuring.
- Owned UI/UX design and built reusable React and TypeScript components, achieving 78% UI consistency; also served as a Product Researcher, using user research and competitive analysis to shape the product roadmap.
- Collaborated in Agile sprints with cross-functional product and engineering teams; participated in code reviews and mentored junior developers on clean-code principles and Git workflows. Recognized as Best Intern.

Software Development Engineer — Kemplast Inc *Sep 2025 – Feb 2026*

- Rebuilt and shipped the production website end to end using Next.js (App Router), React 19, and TypeScript, writing clean, scalable, well-documented code and delivering a responsive UI across devices and browsers.
- Integrated a Supabase (PostgreSQL) backend across a 3-tier client–server–database architecture, with form validation (React Hook Form + Zod) and transactional email via Resend.
- Optimized frontend performance through image optimization, lazy loading, and code splitting; tracked all 3 Core Web Vitals (LCP, INP, CLS) via Vercel Analytics and resolved production defects through root-cause analysis.

PROJECTS

- **Sign Language Recognition Platform** (TensorFlow, MediaPipe, React, Firebase): Built a real-time computer vision system for sign-language recognition with a TensorFlow deep learning model and ML training pipelines; deployed on Firebase for low-latency inference.
- **SENSAI – AI Career Coach** (Next.js, Node.js, Prisma, Gemini API): Engineered a full stack generative AI career assistant that analyzes resumes and delivers personalized mock-interview feedback using LLM prompt engineering, improving evaluation precision by 35%.
- **TEDx MLRIT – Official Event Website** (TypeScript, JavaScript, Supabase): Delivered a responsive, performance-optimized event website with a Supabase backend that reliably handled large-scale event traffic.

CERTIFICATIONS

AWS Cloud Solutions Architect (Coursera) · AWS Cloud Support Associate (Coursera) · Meta Front-End Developer (Coursera) · Meta Back-End Developer (Coursera)

LEADERSHIP & ACHIEVEMENTS

- **Publication, IEEE (May 2026):** Co-authored “Deep Learning-Driven Skin Disease Detection,” applying deep learning and computer vision to automated skin disease classification.
- **Lead, Google Developer Groups on Campus (MLRIT):** Led a 35-member team, grew a 600+ student community, and organized 10+ tech events impacting 2,000+ students.
- **Technical Head, Club Literati (MLRIT):** Launched 4 responsive event websites and mentored 1,000+ students in communication and soft skills.
- **Hackathons & Awards:** Nine-time hackathon finalist with multiple national-level wins.
- **Volunteer, GDG Hyderabad:** Volunteered at 2 DevFest Hyderabad events and served on the organizing team of Agentathon, a Guinness World Record hackathon.
- **Sports:** Represented the Indian Air Force U-19 Basketball Team.
